WORK EXPERIENCE

Bidlabs Inc.

Jan 2025 – Present

Full Stack Developer

Remote

- Develop and maintain full-stack applications using Next.js and Supabase.
- Manage application deployment and server maintenance.
- Developed and deployed a custom server-side solution for an in-house chat service, enabling real-time messaging and user presence tracking.
- Contribute to agile sprints to deliver scalable software solutions

Freelance

Aug 2022 – Jan 2025

Full Stack Developer | Jan. 2023 – Jan. 2025

- Engineered full-stack web apps from scratch using Next.js, Node.js, PostgreSQL, and Docker, delivering scalable MVPs for 5+ clients across SaaS and e-commerce sectors.
- Built secure REST APIs with custom middleware for input validation and error handling.
- Implemented authentication and role-based access control using NextAuth.js and JWT, improving user onboarding and security across multiple platforms.
- Integrated third-party services (e.g., Stripe for payments, SendGrid for emails, Cloudinary for media) to extend core product functionality without reinventing the wheel.

Front-end Developer | Aug 2022 – Jan. 2023

- Developed highly responsive, accessible UI components using React, TypeScript, and Tailwind CSS.
- Converted complex Figma designs into production-ready interfaces across modern browsers.
- Collaborated with backend teams to streamline API integration and ensure seamless front-to-back data flow.

PROJECTS

[DisguisMe](#)

2025

- Developed [disguis.me](#), a privacy-focused web app and browser extension for generating fake personas with custom names, emails, and other identity details to protect user privacy during sign-ups
- Set up a secure email forwarding system using custom domains and server-side logic to route masked emails to real inboxes without exposing user identity

[InstaViewr](#)

2024

- Built [InstaViewr](#), a Next.js web app that lets users view Instagram stories anonymously, no login or account required
- Implemented server-side scraping to fetch and serve public story data while maintaining user privacy and avoiding Instagram detection

SKILLS & INTERESTS

- Languages & Scripting:** TypeScript, Python, SQL, Bash
- Frontend:** React.js, Next.js, Figma
- Backend & APIs:** Node.js, Express.js, FastAPI, Django REST Framework, GraphQL
- DevOps & Deployment:** AWS, Docker, GitHub Actions, Vercel
- Databases:** PostgreSQL, MySQL, MongoDB, Redis
- Tools & Testing:** Git, Jest
- Interests:** Robotics/Mechatronics ; 3d modelling and printing ; Chess
